

# Price Electric Cooperative

A Touchstone Energy® Cooperative 

## Herbicide Use Request

I hereby request that Price Electric Cooperative not use herbicides on the power line right-of-way areas that cross the property owned by me as described below.

By honoring this request, Price Electric Cooperative does not forfeit any easement rights including the right to clear its right-of-way occupied by the Cooperative. Price Electric Cooperative will maintain its right-of-way by using mechanical and hand clearing, removal, and trimming methods. I further understand and agree that the right-of-way used by Price Electric Cooperative is 15 feet on either side of single-phase lines and 20 feet on either side of two and three-phase lines. Price Electric will attempt to identify trees in danger of falling or striking the powerline or equipment that could be outside these measured limits and when necessary, will trim, cut, or remove trees that appear, in the judgment of the Cooperative or its assigned contractors, to be a danger to the distribution system.
